DETAILED ACTION

1. The request filed on 12-24-02 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/381,344 is acceptable and a CPA has been established. An action on the CPA follows.
2. Claims 1 and 4-22 are pending.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 4-18, drawn to a method of expressing a transgenic product in a mammal, classified in class 514, subclass 44.
 - II. Claims 19-22, drawn to a method of screening for an immunosuppressant compound using a mammal, classified in class 800, subclass 3.
4. It is noted that the invention of claims 1 and 4-15 present in the application before the filing of the CPA were subjected to election/restriction requirement as set forth in the office action of 2-1-01 and the instantly claimed inventions are subject to that same election/restriction as set forth in the office action 2-1-01. Applicants are required to restate the species election as responded to the office action of 2-1-01.
5. Inventions of the groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, it is noted that while the method of group II uses the mammal used in the method of group I, the two methods are patentably distinct from each other because the steps of the method of group I can not be used for practicing the steps of the method of group II. Likewise, the steps of the method of group II can not be used to practice the method of group I.

Art Unit: 1632

6. Because these inventions are distinct for the reasons given above, have acquired a separate status in the art shown by their different classification and their recognized divergent subject matter, and because each invention requires a separate, non-coextensive search, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
